

# "Here's Your Receipt"

This register issues a receipt for the amount paid, showing the number of the sale and the initial of the clerk who made it. The amount is added on the cash adding wheels and printed on a strip of paper inside the register.

This proves to the proprietor that he got the money, and proves to the customer that the sale has been handled correctly. It prevents disputes.

When goods are sold on credit a receipt is issued with the amount printed on it; this satisfies the customer that the charge is correct. The amount is added on the charge-adding wheels, which makes it impossible to forget to charge it. This will save the merchant money.

When a customer pays on account the register issues a receipt, proving that the payment will be properly credited. It also adds the amount on the

adding wheels and prints the same record inside for the proprietor's protection.

When money is paid out for any purpose the printed receipt shows the amount paid, and when a clerk paid it out the amount is added on the adding wheels and the receipt is signed by the party who received the money. This protects the merchant.

This register is easy to understand, simple to operate, and saves time and money.
